**Guide for Windows
users to downgrade
Firefox**

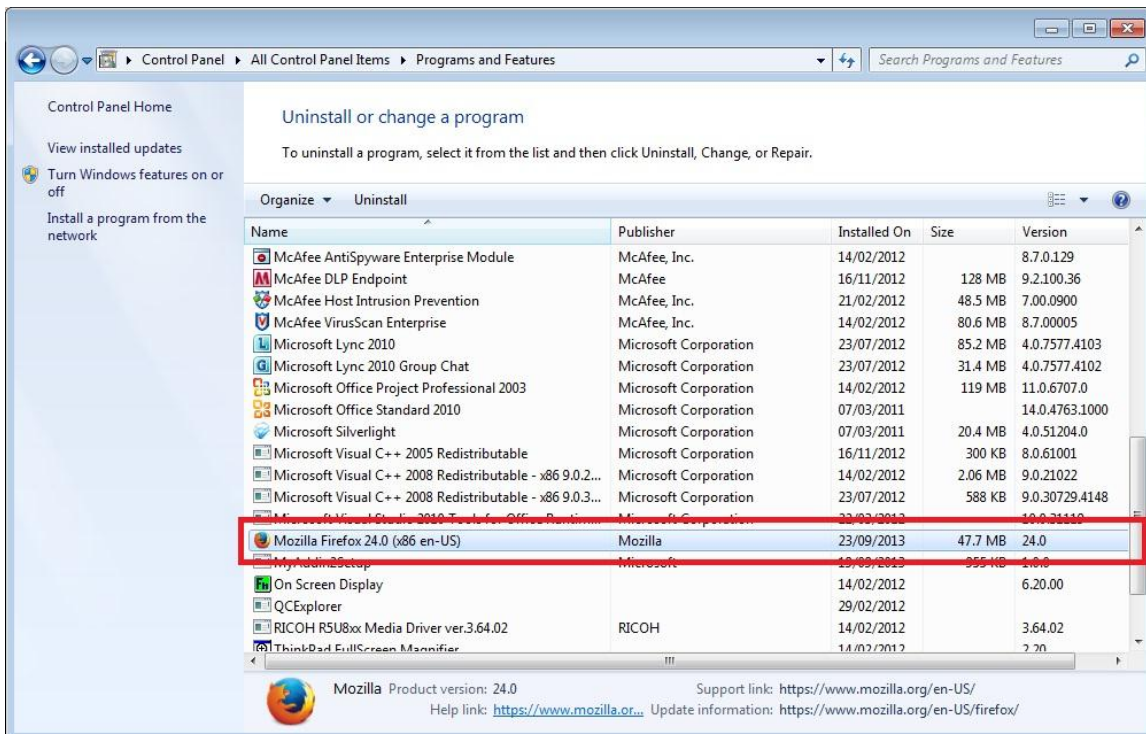

Downgrade Firefox in Windows

Note: Before starting the installation, please ensure that all Firefox windows are closed.

1. Start > Control Panel
2. Double click on **Programs and Features**

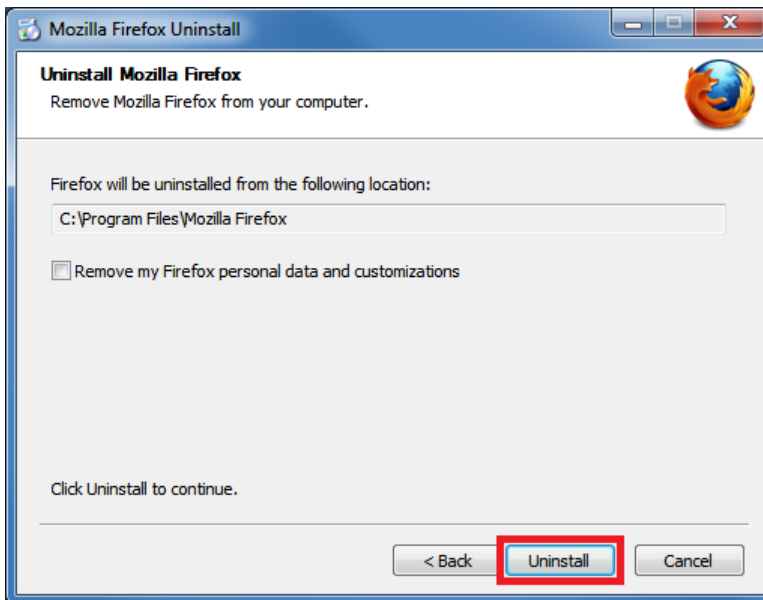

3. Double click on **Mozilla Firefox 24.0 (same steps for versions 21/22/23)**

4. Click on **Next >**

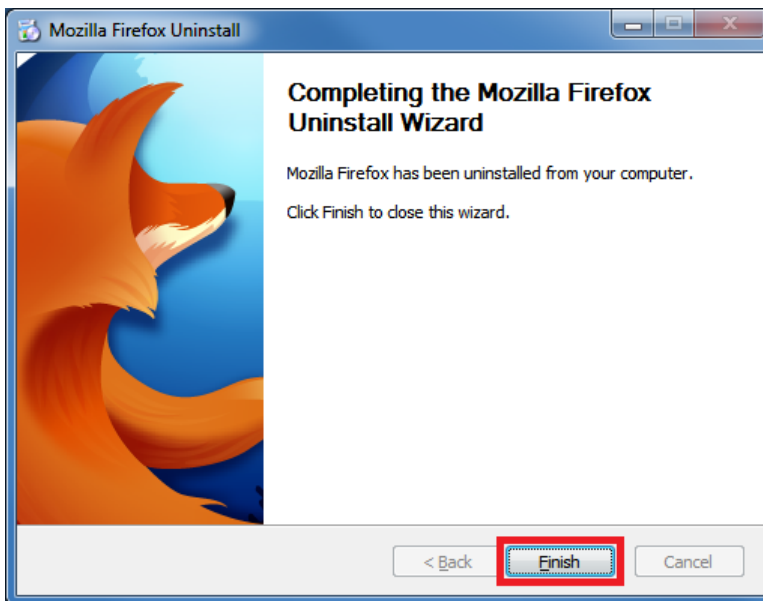

5. Click on **Uninstall**

6. Wait for the uninstallation to complete

7. Click **Finish**

8. Launch the following URL using Internet Explorer or other browsers:

<http://ftp.mozilla.org/pub/mozilla.org/firefox/releases/20.0.1/win32/en-US/>

9. Click on “**Firefox Setup 20.0.1.exe**”

10. Click on **Run**

11. Wait for the download to complete

12. Click on **Run**

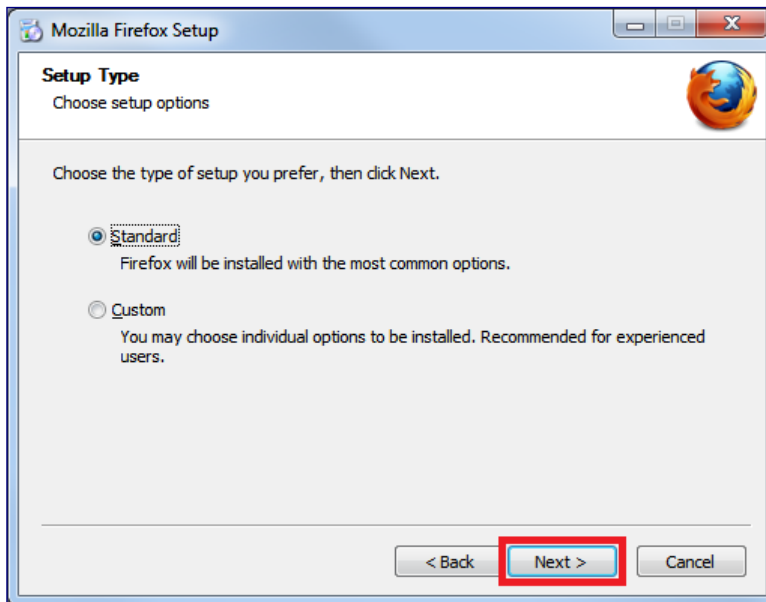

13. Wait for the extraction to be completed

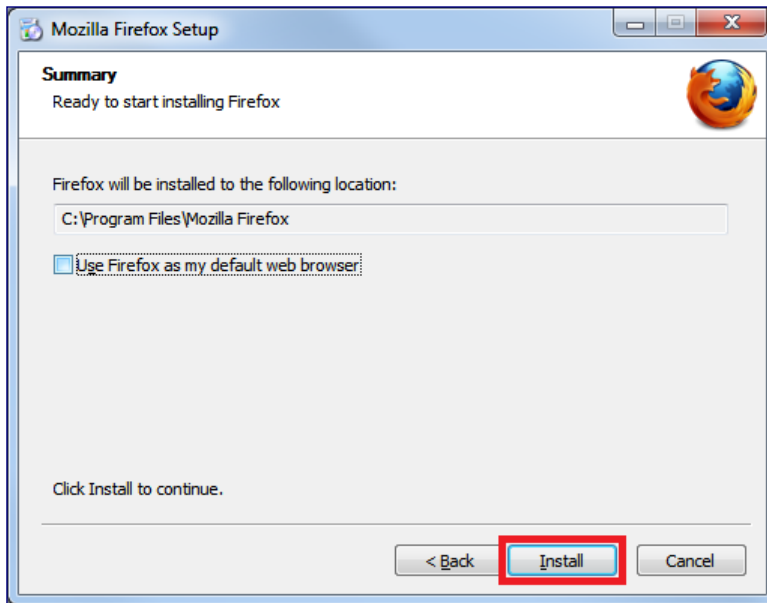

14. Click on **Next >**

15. Select Standard and Click on Next >

16. Click on **Install**

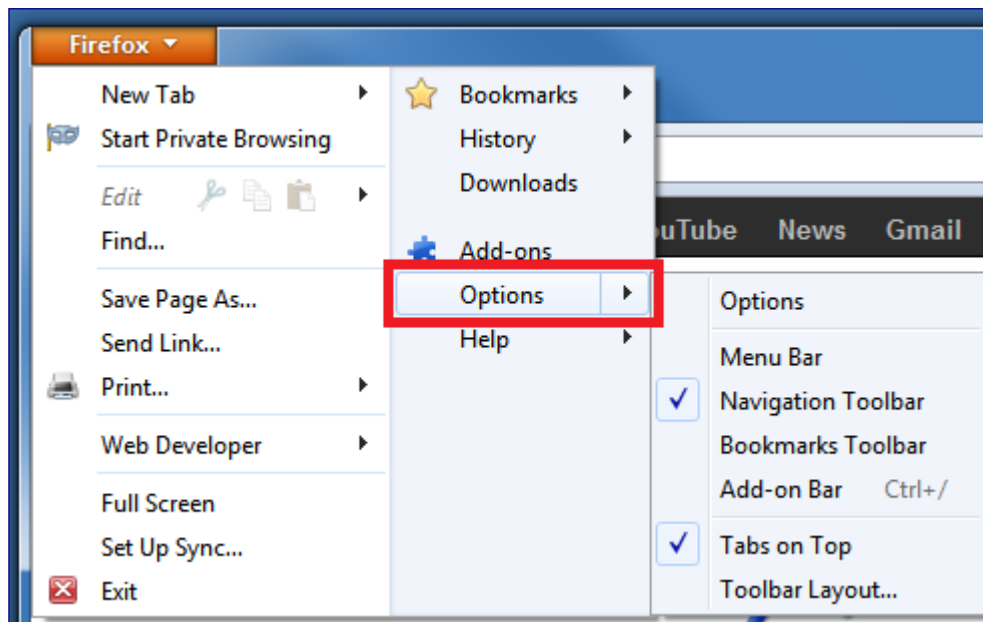

17. Wait for the installation to be completed

18. Click on **Finish**

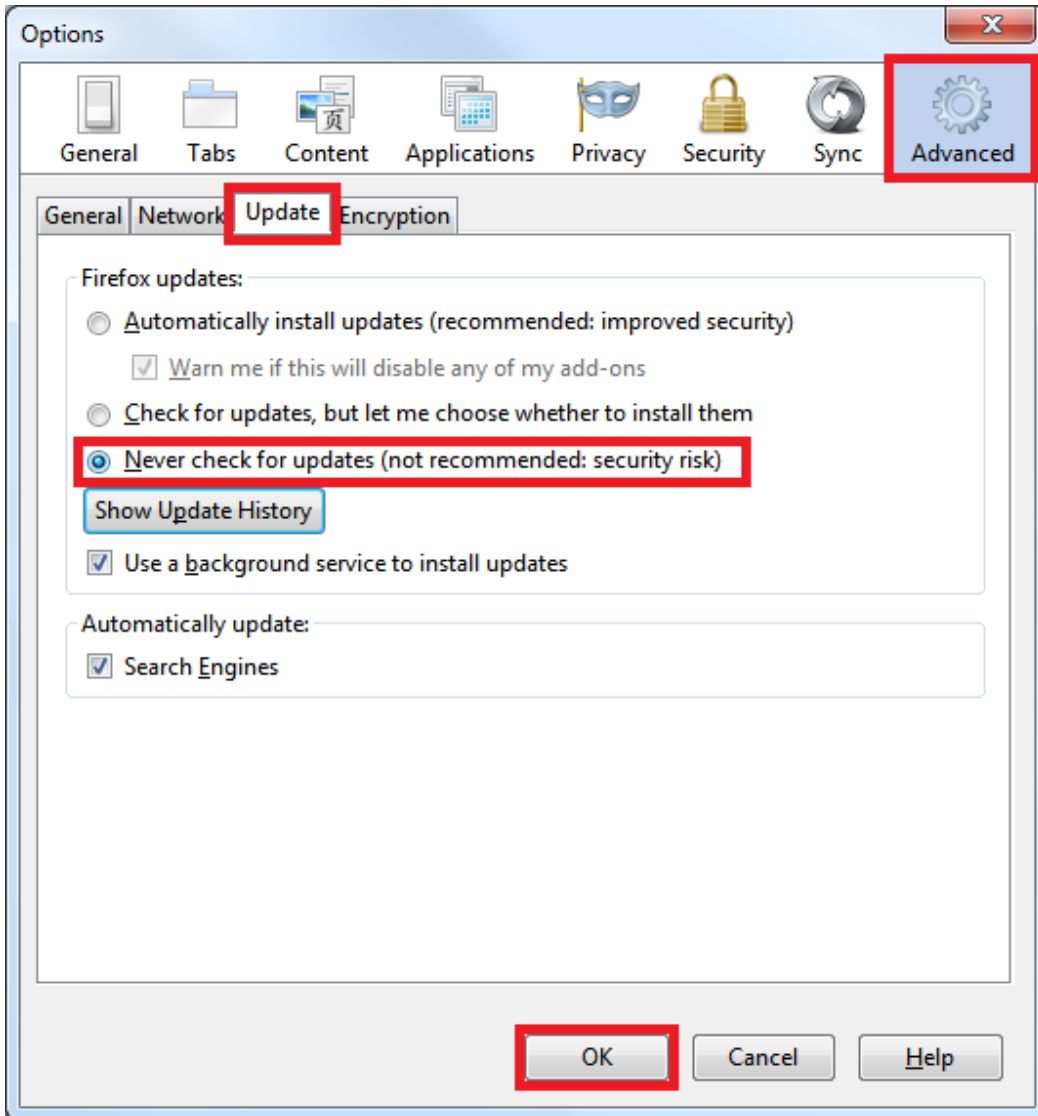

19. Once Firefox 20 is launched, click on **Firefox** (on the top left) > **Options**

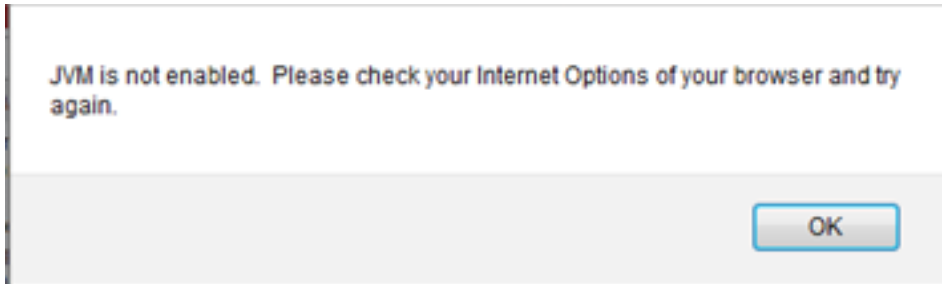

20. Go to **Advanced > Update**

21. Select “**Never check for updates**” then click on **OK**

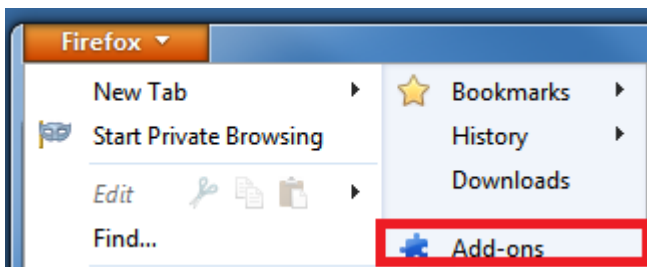

Note: Do not be alarmed by the “not recommended: security risk” option, you can always update your Firefox browser as and when you want via the Firefox website.

22. Launch <https://bbmy.ocbc.com>, if you are hitting below error, please refer to **step 23 and Step 24**. Else downgrade Firefox is completed.

23. Click on **Firefox** (on the top left) > **Add-Ons**

24. Click on **Plugins** and click on **Enable** button to enable the JVM marked in "Red"
