CREDIT RISK

With Basel II implementation, OCBC Al-Amin Bank Berhad has adopted the Internal Ratings-Based (IRB) Approach for major credit portfolios, where 3 key parameters – Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD) are used to quantify credit risk.

Credit Exposures under Standardised Approach

Credit exposures under standardised approach are mainly exposures to sovereign, debt securities, personal financing to individuals and other assets. Rated exposures relate to sovereign and debt securities while unrated exposures relate mainly to personal financing and other assets.

Actual Loss and Expected Loss for Exposures under Foundation and Advanced IRB Approaches

Actual loss refers to net impairment loss allowance and direct write-off to the statement of profit or loss during the year. Expected loss ("EL") represents model derived and / or regulatory prescribed estimates of future loss on potential defaults over a one-year time horizon. Comparison of the two measures has limitations because they are calculated using different methods. EL computations are based on LGD and EAD estimates that reflect downturn economic conditions and regulatory minimums, and PD estimates that reflect long run through-the-cycle approximation of default rates. Actual loss is based on accounting standards and represents the point-in-time impairment experience for the financial year.

Benchmark Rate Risk in Banking Book

The benchmark rate risk in the banking book is monitored on a monthly basis and behavioural assumptions for indeterminate deposits have been implemented. The impact on net profit income of the banking book is simulated under various benchmark rate assumptions for major currencies. As at 31 Dec 2014, based on a scenario where MYR benchmark rate shifted up by 50-basis point on parallel basis, the net profit income is estimated to increase by RM 5.3 million. The corresponding impact from a 50-basis point shifted down is estimated to reduce by RM 5.4 million in net profit income.

SHARIAH GOVERNANCE

Non-Shariah compliant events refer to any events which are not in accordance with the rules set by the Shariah Committee of the Bank or by BNM's Shariah Advisory Council. In line with the Guideline on Shariah Governance Framework for Islamic Financial Institutions (IFI), the Bank is managing Shariah Non-compliance risk arising from its activities and operations.
