3 Select your preferred 2-Factor Authentication (2FA) Token. Just follow the instruction given on your screen to complete the registration.

Security Token
2 Factor Authentication is an added security benefit for your online transactional experience via OCBC Internet banking. To serve you better, we are offering a choice of 2 tokens to meet your lifestyle needs.

For first time application, simply select your preferred type of security token and click "Next". If you do not wish to continue with the selection, you may click "Cancel". You will still be able to login and apply for the security token at a later stage.

Frequently Asked Questions

1. **I could not login and was prompted with an error message "This page cannot be displayed". Why?**
   OCBC Internet Banking requires Java Virtual Machine (JVM) to be installed on your personal computer. You may download and install JVM for free from http://www.java.com. For more information, please refer to OCBC Bank website.

2. **What is 2-Factor Authentication (2FA) or Security Token?**
   2FA is an added security feature of OCBC Internet Banking. A 6-digit *One Time Password* (OTP) is required each time you perform high risk transactions like funds transfer to unregistered third party.
   OCBC offers 2 methods of receiving the OTP. You may choose to have a small hardware device which will generate an OTP upon request or have the OTP sent to you via SMS on your registered mobile phone.
